

# ECOPROFIT® Club Augsburg

## 2025/2026

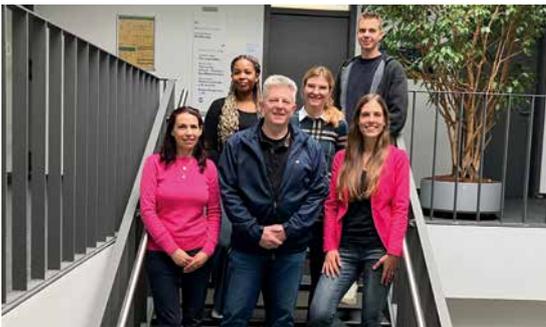

### Shaping a sustainable future — together

Stadtwerke Augsburg (swa) is an independent municipal utility company and a key pillar of regional infrastructure. The group currently consists of eleven limited liability companies operating as part of the Stadtwerke Augsburg Holding GmbH. With 2,314 employees, swa is the third-largest municipal utility provider in Bavaria, delivering essential services to around 350,000 people in Augsburg and the surrounding region — including

electricity, natural gas, district heating, drinking water, telecommunications, and modern mobility solutions.

Its core business spans energy supply, operation of generation facilities, energy services, and infrastructure networks for a wide range of resources.

Beyond utilities, swa plays a vital role in keeping the region moving — operating public transport and offering forward-thinking mobility options such as car sharing and ride sharing (swaxi).

### Project Plan ECOPROFIT® Club

#### Workshops

1. **Club-WS:** KICK-OFF – 05/2025
2. **Club-WS:** Mobility & Scope 3 Emissions – 07/2025

Per year, the 15 ECOPROFIT®-companies collectively save:

Energy/emissions	Electricity	507 939 kWh
	Heat	754 639 kWh
	Fuels	376 792 kWh
CO <sub>2</sub> -emissions		469 230 kg
Raw materials/waste	Waste/resources	3 400 kg
	Water	350 000 l
Transacted investments		1 514 268,83 €
Yearly savings in cost		383 719,81 €

### What is ECOPROFIT®?

ECOPROFIT® (ECOLOGICAL PROJECT FOR INTEGRATED ENVIRONMENTAL TECHNOLOGY) is a project of the City of Augsburg. Permanent cooperation partners are the Bavarian State Office for the Environment, the Swabian Chamber of Industry and Commerce (IHK Schwaben), and the KUMAS Association. The City of Augsburg supports companies through ECOPROFIT® in improving their corporate environmental protection measures. With the support of the consulting company Arqum GmbH, the participating companies develop 64 practical measures, which not only reduce the environmental impact, but also costs.

The ECOPROFIT® measures contribute to sustainable businesses. ECOPROFIT® is therefore an important project for environmental and climate protection.

- Sum of measures not invested
- Sum of measures with amortization in 1 to 3 years
- Sum of measures with amortization in over 3 years
- Sum of measures with inestimable costs
- Sum of measures with additional costs

These were the ECOPROFIT® Club members in 2025/2026:
